

World Heritage Site Card Game

Teachers' Guidance Notes

Learning Objectives

- To research a range of different types of World Heritage Sites, their location and their special features and importance
- To understand that there are different types of World Heritage Sites and that Pontcysyllte Aqueduct and Canal is just as important as other better known sites
- To develop memory and research skills

Resources

- Site Cards and Clue Cards for duplication
- Blank card templates

Instructions for the Game

This is a memory matching game as well as a guessing game of World Heritage Sites.

- Take the two stacks of cards, the Site Cards and the Clue Cards and lay each set out in a row face down on the table.
- Taking it in turns, turn over one Site Card and one Clue Card and try to match the site with the correct clue that describes that site. If you picked the wrong clue, replace both cards back in the same position face down in their row. Try to remember where you put it back for next time round!
- If you picked correctly and you have managed to match the Site Card with the correct Clue Card then keep that pair in front of you.
- Once all the cards have been picked, the person with the most pairs of cards in front of them is the winner!

Extra activity: Can you find where in the world these World Heritage Sites are on a map?

Design Your Own World Heritage Site Cards

Now you have had a go at the game with a few of the example cards, make some of your own cards using the templates provided to add to the stack.

1. Research some more World Heritage Sites and find some interesting facts.
2. Once you have chosen your favourite ones, create a picture of the chosen site, either draw it or print out a picture to stick onto the card. Add which country the site is located in.
3. Then create the Clue Card by writing a short sentence that gives a clue and some interesting information about the site but doesn't give away too much!
4. Play the game again with your new cards.
